

Khaled Alsanafi

Software Engineer, Mobile and Full-Stack

Kuala Lumpur, Malaysia +60 12-945 2506 khaledalsanafi101@gmail.com github.com/sansRebel LinkedIn Portfolio

Profile

Software engineer who ships complete products. Built and launched Nurmart's mobile commerce platform as its sole engineer, owning everything from architecture and ERP integration to payments, delivery, infrastructure, and app store release. Previously built for national government platforms used across Malaysia, and works AI-native, routing between frontier and open-weight models to ship faster at lower cost.

Experience

Software Engineer at Nurmart, Kuala Lumpur [App Store](#) [Google Play](#) Jan 2026 – Present
Technical owner of the company's mobile commerce platform, from first commit to live production.

- **Mobile app.** Built the iOS and Android app from scratch in Flutter, shipping the full commerce journey: accounts, catalog, search, cart, checkout, orders, promotions, and loyalty.
- **Backend.** Designed the API layer between the app and Odoo ERP, serving a catalog of 3,000+ products with multi-branch inventory, orders, promotions, and loyalty.
- **ERP.** Extended Odoo modules and workflows in Python so app orders flow straight into inventory and fulfilment.
- **Integrations.** Connected Fiuu payments, Lalamove delivery, Google Maps, and Apple and Google sign-in into one flow from search to doorstep.
- **Infrastructure.** Built GitHub Actions CI/CD, ran Linux deployments, and owned production incidents across the whole stack.
- **Launch.** Took the app through App Store and Google Play approval to soft launch, owning testing, builds, and signing.
- **Data-driven iteration.** Instrumented the app with Firebase Crashlytics and Google Analytics, using crash and user behaviour data to prioritise fixes and keep improving the product.
- **Business impact.** Turned retail, payment, and delivery requirements from management into shipped features.
- **AI engineering.** Builds with Claude Code and Cursor, routing work between frontier and open-weight models to balance output quality against cost, with every generated change reviewed and tested before release.

Frontend Developer at RF Laiyon Interactive, Cyberjaya Apr 2024 – Sep 2024
Six-month full-time placement building national government platforms used across Malaysia.

- **National scale.** Delivered production features for eSPBT, the system Malaysian government schools use to order textbooks nationwide, taking UI work from sprint ticket to release.
- **Public sector.** Built and maintained lhsan Madani, a national platform giving citizens visibility into social welfare programs.
- **Component architecture.** Engineered reusable, accessible React and TypeScript components on Chakra UI, wired to backend REST APIs and shared across product modules.
- **API contracts.** Defined and validated API contracts with backend engineers in Postman, catching integration issues before they reached production.
- **Team delivery.** Full member of a cross-functional Agile team in weekly sprints, from planning to peer code review.

Projects

- PropertyGalla** Next.js, TypeScript, .NET MVC, AWS
Full-stack property management platform with role-based access, listings, and reporting, deployed on AWS EC2, Elastic Beanstalk, and RDS.
- NextEndeavour** Next.js, Node.js, Dialogflow
NLP chatbot that maps a user's skills and interests to real career paths through custom Dialogflow intents.
- VerseVault** Next.js, TypeScript, MongoDB, Cloudinary
Blogging platform with authentication, post editing, image uploads, likes, and comments over REST APIs.

Skills

Languages	TypeScript, JavaScript, Dart, Python, C#, SQL
Mobile & frontend	Flutter, React, Next.js, Tailwind CSS, Chakra UI
Backend & ERP	Node.js, Express.js, .NET MVC, REST APIs, OAuth, Odoo
Data & cloud	PostgreSQL, MongoDB, AWS (EC2, Elastic Beanstalk, RDS), Linux
DevOps & testing	GitHub Actions, CI/CD, Jest, Postman, Git
Monitoring & analytics	Firebase Crashlytics, Google Analytics
AI engineering	Claude Code, Cursor, frontier and open-weight LLMs, cost-aware model routing

Education

- BSc (Hons) Software Engineering**
Asia Pacific University, Kuala Lumpur
2022 – 2025
- Languages**
- Arabic (native), English (fluent), Spanish (basic)
